oprima el numero 0

Services provided by the program to eligible women include:

- Breast and cervical cancer screening exams (clinical breast exams, mammograms, and Pap tests).
- Diagnostic services for abnormal screening exams
- Care coordination to all clients with abnormal exams
- Women screened through the program and diagnosed with breast or cervical cancer are referred to the Florida Medicaid Program for eligibility determination.
- Paid breast and cervical cancer treatment through Medicaid for eligible women screened through the program as funding allows.

For women under the age of 50, please contact us for additional resources.

Funding provided by the Centers for Disease Control and Prevention, through the Florida Breast & cervical Cancer Early Detection Program, Florida Department of Health.

Important Facts

- Detecting any cancer at an early stage is the key to improved survival and decreased mortality rates.
- Research indicates that regular mammography and clinical breast exams can reduce breast cancer mortality by 30% among women 50 years and older.
- Mortality due to cervical cancer is preventable if caught early.
- Risk of both breast and cervical cancer increases with age.
- Almost one in five Floridians, or 20% of Florida residents, lack health insurance (U.S. Census Bureau, Current Population Survey, 2008 Annual Social and Economic Supplement).
