

BAY CORRECTIONAL FACILITY SUPPLEMENTAL REPORT

For CMA Survey Conducted July 23-26, 2002

PHYSICAL AND MENTAL HEALTH SURVEY FINDINGS REQUIRING OHS INTERVENTION

In addition to the physical and mental health findings of Bay Correctional Facility (Bay CF) referenced in the main body of the survey report (which fall within the scope of the institutional staff to correct), several other areas of concern were noted. These findings may be based on standards adopted by the CMA, but not addressed in OHS policy, procedure, or directive, or on other issues beyond institutional control. Therefore, corrective actions at the institutional level can be initiated only by or with the authority or intervention of the OHS.

The items listed below identify the finding, the name of the audit instrument used by CMA surveyors and the specific screen number, if applicable, and what criteria were used to determine the standard was not met.

PHYSICAL HEALTH

No evidence was available demonstrating annual peer review of the CHO and other licensed health care practitioners. This standard is referenced in the CMA Quality Management Systems Review Instrument, Question 16 and is based upon national correctional healthcare standards and prevailing professional practices in the community at large.

MENTAL HEALTH

Physician's orders (when present) did not specify observations at least every 15 minutes for inmates admitted to the infirmary for observation and prevention of self-injurious/suicidal behavior. This standard is referenced in the CMA Self-Injury/Suicide Prevention Record Review Instrument, Screen 3 and is based upon national correctional healthcare standards and prevailing professional practices in the community at large.
