

GLADES CORRECTIONAL INSTITUTION SUPPLEMENTAL REPORT

For CMA Survey Conducted April 1-4, 2003

PHYSICAL HEALTH SURVEY FINDINGS REQUIRING OHS INTERVENTION

In addition to the physical health findings of Glades Correctional Institution referenced in the main body of the survey report (which fall within the scope of the institutional staff to correct), a couple other areas of concern were noted. These findings may be based on standards adopted by the CMA, but not addressed in OHS policy, procedure, or directive, or on other issues beyond institutional control. Therefore, corrective actions at the institutional level can be initiated only by or with the authority or intervention of the OHS.

The items listed below identify the finding, the name of the audit instrument used by CMA surveyors and the specific screen number, if applicable, and what criteria were used to determine the standard was not met.

PHYSICAL HEALTH

1. **The restroom available to the infirmary was only partially handicapped equipped.** This standard is referenced in the CMA Medical Area and Inmate Housing Review Instrument, Question 30.
2. **Confinement inmates were not offered one hour of exercise per day, outside the cell, five days per week.** This standard is referenced in the CMA Administrative Review Instrument, Question 23.
