

Brain & Spinal Cord Injury Program

Florida Department of Health

coordinated statewide system of services:

- case management
- acute care
- rehabilitation
- transitional living
- assistive technology
- home & vehicle modifications
- home & community based services
- resource centers
- long-term supports for survivors
and families through contractual
agreements with community-based
agencies

PROGRAM BROCHURE
JUNE 2009

The mission of the Florida Department of Health is to promote and protect the health and safety of all people in Florida through the delivery of quality public health services and the promotion of health care standards.

Who are we?

The Brain and Spinal Cord Injury Program (BSCIP) is administered by the Florida Department of Health. The program is funded through a percentage of traffic-related fines, surcharges for driving or boating under the influence, fees on temporary license tags, and a percentage of fees from the motorcycle specialty tag.

What do we do?

The Brain and Spinal Cord Injury general program provides case management and resource facilitation as its primary services. This is accomplished by employing a statewide system of case managers and rehabilitation technicians. Children receive services from the employment of Children's Medical Services nurse care coordinators and human services counselors. The program also employs regional managers who supervise the staff in their region and who oversee locally the operation, development, and evaluation of the program's services and supports.

Services include: case management; acute care; inpatient and outpatient rehabilitation; transitional living; assistive technology; home and vehicle modifications; nursing home transition facilitation; and long-term supports for survivors and families through contractual agreements with community-based agencies.

In addition to providing resource facilitation and funding for the services above, the program funds education, prevention, and research activities. It expands its services by funding contracts with the Brain Injury Association of Florida, the Florida Alliance for Assistive Services and Technology, and the Florida Spinal Cord Injury Resource Center. Other services are provided through agreements with the Florida Centers for Independent Living, the Florida Disabled Outdoors Association, and the Florida Department of Education, Division of Vocational Rehabilitation.

What else do we do?

THE BSCIP MEDICAID WAIVER PROGRAM

For those individuals eligible for Medicaid and needing lifetime supports, the Brain and Spinal Cord Injury Program also provides home and community-based services for individuals who are at risk of nursing home placement. The purpose of the waiver is to provide Medicaid eligible individuals who meet the state definition of brain and spinal cord injury and who meet nursing home level of care with the long-term community-based services and supports required to live safely and independently in the community. The annual cost is not to exceed that of skilled nursing placement.

Who is eligible?

Florida Statute 381.76 requires that an individual must be a legal Florida resident who has sustained a moderate-to-severe traumatic brain or spinal cord injury meeting the state's definition of such injuries; has been referred to the BSCIP Central Registry; and must be medically stable to be eligible for services.

There must also be a reasonable expectation that with the provision of appropriate services and supports, the person can return to a community-based setting, rather than reside in a skilled nursing facility.

THE STATE DEFINITION OF A BRAIN INJURY

An insult to the skull, brain, or its covering, resulting from external trauma, which produces an altered state of consciousness or anatomic, motor, sensory, cognitive or behavioral deficit.

THE STATE DEFINITION OF A SPINAL CORD INJURY

A lesion to the spinal cord or cauda equina resulting from external trauma with evidence of significant involvement of two of the following—motor deficit, sensory deficit, or bowel and bladder dysfunction.

How are referrals made?

Referrals may be made in several ways. For health facilities with the necessary technology and a secure system, referrals may be made on-line. Referrals may also be called into the Central Registry at 1-800-342-0778 or faxed to 850-410-1975. Florida Statute (381.74) requires that all hospitals, attending physicians, public, private, or social agencies refer all new traumatic moderate-to-severe brain or spinal cord injuries to the BSCIP Central Registry.

Individuals may also refer themselves to the Central Registry by calling 1-800-342-0778.

What happens next?

A BSCIP case manager or Children's Medical Services nurse care coordinator representing the program will contact the individual reported to the BSCIP Central Registry within 10 working days. The case manager or care coordinator will work with the individual and family to determine program eligibility and provide information about federal, state, and community

resources. When appropriate and necessary, an individual community reintegration plan will be developed and implemented. The

BSCIP is the payer of last resort and funding for services is based on availability of funds.

Community Reintegration and Employment

The Brain and Spinal Cord Injury Program strives to provide or facilitate the services and supports necessary to return individuals who sustain a traumatic brain or spinal cord injury to their community and to enhance independence through employment.

The Program does this in several ways:

4

A BSCIP case manager representing the Program will contact all individuals reported to the BSCIP Central Registry within 10 working days.

- Through contractual agreements with community-based agencies;
- Through collaboration and partnerships with the Centers for Independent Living; and
- Through collaboration and partnership with the Department of Education, Division of Vocational Rehabilitation

For more information about the Division of Vocational Rehabilitation, visit their website at: www.rehabworks.org or call their toll-free line at **1-800-451-4327**.

Designated facilities

HOW DOES THIS WORK?

The BSCIP has developed standards for best practices for provision of acute, trauma, and inpatient/outpatient rehabilitation services. Facilities meeting these standards are strategically located throughout the state. The BSCIP has also designated transitional living facilities to assist individuals to develop the specialized skills necessary to return to their communities.

A case manager or care coordinator will provide additional information on facilities in your area.

Information on the network of designated facilities may be found at

www.myflorida.com

key words: brain, spinal cord

BSCIP regional offices

BSCIP services are provided through regional offices. For more information, please contact the regional office in your area.

Designated facilities strategically located throughout the state have been identified to ensure the provision of quality acute, trauma and rehabilitation services.

REGION 1

Brain & Spinal Cord Injury Program Office
Midtown Centre

2000 Building, Suite 101-B

3974 Woodcock Drive

Jacksonville, FL 32207

904-348-2755

Serving counties: Alachua, Baker, Bay, Bradford, Calhoun, Clay, Columbia, Dixie, Duval, Escambia, Franklin, Gadsden, Gilchrist, Gulf, Hamilton, Holmes, Jackson, Jefferson, Lafayette, Leon, Levy, Liberty, Madison, Nassau, Okaloosa, Santa Rosa, St. Johns, Suwannee, Taylor, Union, Wakulla, Walton, Washington

REGION 2

3751 Maguire Blvd., Suite 211

Orlando, FL 32803

407-897-5964

Serving counties: Brevard, Citrus, Flagler, Hernando, Lake, Marion, Orange, Osceola, Putnam, Seminole, Sumter, Volusia

REGION 3

Brain & Spinal Cord Injury Program Office

9400 4th Street, North, Suite 212

St. Petersburg, FL 33702

727-570-3427

Serving counties: DeSoto, Hardee, Highlands, Hillsborough, Manatee, Pasco, Pinellas, Polk, Sarasota

REGION 4

Brain & Spinal Cord Injury Program Office

4500 North State Road 7, Suite 308

Lauderdale Lakes, FL 33319

954-677-5639

Serving counties: Broward, Charlotte, Collier, Glades, Hendry, Indian River, Lee, Martin, Okeechobee, Palm Beach, St. Lucie

REGION 5

Brain & Spinal Cord Injury Program Office
401 Northwest 2nd Avenue, Room S-221
Miami, FL 33128

305-377-5464

Serving counties: Dade, Monroe

Resource centers

WHAT ELSE DO WE DO?

The BSCIP supports three comprehensive statewide resource centers. These centers maintain the most up-to-date information pertaining to brain and spinal cord injury, assistive technology, medical, social and financial resources, and other

information. They provide linkages to related initiatives and specific information to help individuals and

their families cope with injury and its long-term consequences.

The BSCIP also supports prevention and education activities through contracts with our community-based partners.

. . . centers maintain the most up-to-date information pertaining to brain and spinal cord injury, assistive technology, medical, social, and financial resources, and other information.
