COPD*	65	24.5	35.1	292	42.3	47.6	60.0

*COPD-Chronic Obstructive Pulmonary Disease.

*A crude death rate gives a general estimate of mortality in a population; it does not provide an accurate picture of the true nature of mortality because of the differences of population composition.

*An age-adjusted death rate (AADR) adjusts the differences in age distribution and allows populations with different age structures to be compared. These two rates are per 100,000 population.
